From master thriller writer Michael Crichton: Two imaginative masterpieces of speculative science, full of adventure and larger-than-life characters. In Jurassic Park, scientists of today clone dinosaurs of the prehistoric past to serve as attractions in a modern theme park. When a rival biogenetic firm attempts to steal the scientists secret, the stage is set for a nightmare of science and dinosaurs run amok. The Lost World picks up the story six years later, with scientists scrambling to find the jungle island that served as the dinosaur production factory for Jurassic Park. Once again, rivalry and subterfuge combine to create life-threatening dangers for the scientists, who must contend with the rampaging dinosaurs as well as their cutthroat competitors.
